## Why Choose Infracore?

We collaborate with clients to understand their systems before making any updates or improvements. Working side-by-side as an extended or in-house IT team, we offer high-touch, high-value services that secure each business's digital operations, increase productivity, and foster innovation.

We specialize in supporting the IT and cybersecurity needs of midsize, technology-intensive companies with 100 – 2,500 employees.

Managed Services	Project-Based Services	Cybersecurity
<ul style="list-style-type: none"><li>▪ Dedicated support personnel</li><li>▪ Able to scale quickly and easily</li><li>▪ Senior/executive leadership and oversight</li></ul>	<ul style="list-style-type: none"><li>▪ CIO consulting</li><li>▪ Project planning</li><li>▪ Architecting and engineering</li><li>▪ IT staff augmentation</li></ul>	<ul style="list-style-type: none"><li>▪ Cybersecurity audits / Regulatory compliance</li><li>▪ Executive-level risk and gap analysis</li><li>▪ HIPAA, SOX and FDA</li></ul>

## Examples of current client engagements:

- Provide regularly-scheduled backup assessments, security audits and vendor management as part of the management of IT department for publicly-traded biotech firm with 250 employees. Our engagement includes an IT manager plus 3 support personnel.
- Detailed engagement with 600-employee global automatic and renewable energy engineering firm, including Daily/Weekly/Monthly/Quarterly preventative and maintenance tasks, patch management, and IT steering committee leadership. Includes IT director plus 4 support personnel.
- Review of IT policies with a focus on HIPAA compliance for 1200-employee medical devices company, identifying proper communication and collaboration between different in-house IT functions. Uncovered constraints related to resource and expertise, which Infracore filled to implement best practices.
- Cybersecurity audit of an investment management company to determine vulnerabilities related to Microsoft Azure, Microsoft 365, firewall and VPN security, access control and end-point security. Final report included a thorough risk assessment and needed remediation steps.
