INFRACORE®
Providing best-in-class IT services

Project-Based IT Services

Unlock Your IT Potential with Infracore

Microsoft Office 365

IT Infrastructure Projects

Fractional Expertise
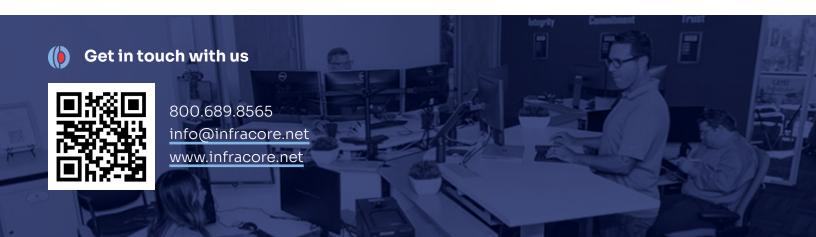

Cybersecurity

Strategic Consulting (VCIO)

We enhance the effectiveness of your IT efforts by:

- Broadening your reach, completing new — or long-overdue — IT projects
- Filling knowledge-based or experience-based gaps
- Reviewing system configuration and assessing cybersecurity posture
- Providing specialist expertise and capacity to solve intractable IT challenges

Infracore provides Project–Based IT services that are on–site, hybrid or virtual

Microsoft Office 365 Support

- New deployments
- Migrations to M365 from on-premise and other cloud platforms
- M365 security audits
- Teams, SharePoint, OneDrive audit and optimization

IT Infrastructure Projects

- Cloud migrations
- Enterprise application upgrades
- Endpoint upgrades
- Network upgrades
- Data center migrations

Fractional Expertise

- Roles: Systems Administrator through Senior Engineer
- Oversight on internal prioritization and IT changes
- Additional capacity for project surges
- Coverage for planned in-house team absences

Strategic Consulting

- Highly-experienced technology expertise (vCIO)
- IT department assessments (People, Processes and Technology)
- Roadmaps and planning
- Governance and compliance review

Cybersecurity

- System/network vulnerability scanning
- On-premise, IaaS and SaaS audits
- Physical security audits
- Policies & procedures review
- Implementation roadmap & remediation projects

Case Studies

- A client with a promising new diagnostic test for colon cancer needed to go from research and development to commercialization on an extremely tight time schedule. We supported our client's HIPAA compliance efforts, upgraded their collaboration platform to Microsoft 365, moved the majority of their infrastructure to the AWS cloud, implemented IT controls for the CLIA Lab, and assisted with the rapid growth of a nationwide sales and support staff.

- As a marketplace leader with a new breakout product, a medical devices company was experiencing an exponential headcount growth, significant geographical expansion, and a need to rapidly scale the capabilities of the IT department to meet growth. Infracore's vCIO services were engaged to assess IT capabilities, build a roadmap, assist with the hiring of new executive-level IT leadership, and support the transition. The relationship quickly expanded to include enhancements to the IT policies and procedures, as well as the completion of technical projects using multiple Infracore resources.

- A customer developing next-generation, life-saving technology required a reliable method of sharing data with strategic partners while keeping data protected from exfiltration. Infracore hardened the Microsoft 365 environment to industry standard and architected secure SharePoint and Teams portals.

- Executive leadership team needed to be sure that their IT systems were secure against attack from bad actors. Infracore performed a comprehensive security audit including configuration analysis, comprehensive vulnerability scanning and penetration testing, and provided a graded report documenting all findings.
